How to read this calendar

Find the estimated conception date in the Gregorian date ranges. The first and last periods are limited to the chosen year. Wayeb (Uayeb) is period 19.

Use the mother’s completed age at conception, from 16 to 50. Age increases on her birthday: change rows on that date if a period includes her birthday.

Read the cell at that age and period. In this game, an even sum of age and period number means girl; an odd sum means boy. No probability is implied.

Dates use the Goodman-Martínez-Thompson correlation, with 21 December 2012 = 3 Kankin. Periods are numbered 1-19 for this game; the historical origin of its prediction rule is unestablished.

The Smithsonian explains the Haab and these date correspondences, not a method for predicting a baby’s sex.
